SUMMARY

Fourth-year BSIT student specializing in Web and Mobile Application Development with experience in building responsive and user-friendly web applications. Eager to apply front-end and back-end development skills to real-world projects while continuously learning and contributing to impactful solutions.

WORK EXPERIENCE

Full-Stack Web Developer Intern

February 2026- Present

Codebility

- Contributing to an internal full-stack project under Codebility Portal and Codev Play, building API routes with Node.js/Express and implementing frontend features using Next.js.
- Writing clean, organized code and participating in bi-weekly sprint meetings and code reviews with the development team.

Freelance Web Developer – Commission Projects

July 2025

- Designed and deployed a custom portfolio website for a client using HTML, CSS, and JavaScript.
- Implemented responsive layouts and interactive elements to showcase the client's work effectively across devices.

Freelance Graphic Designer

2025-2026

CompareLoans.PH • Red Circle Global — Remote

- Designed the official logo and visual identity for CompareLoans.PH.
- Designed promotional and email marketing materials with strong brand consistency.
- Developed a CEO pitch deck with clear visual storytelling and professional structure.
- Collaborated remotely with stakeholders to align visual design with project goals.

IT Support / Data Encoder

2020-2023

Municipal Senior Citizen's Federation Office

- Encoded, organized, and maintained accurate digital records while handling sensitive information with confidentiality.
- Provided basic IT support, including troubleshooting PCs, printers, and common hardware/software issues.

EDUCATION

Far Eastern University Institute of Technology

2023-Present

Bachelor of Science in Information Technology with specialization in Web and Mobile App

Southern Luzon State University

2021-2023

Science, Technology, Engineering, Mathematics

PROJECTS

Sexual Violence Case Reporting System (Capstone Project)

- Developing a secure web and mobile platform for reporting cases with role-based access and admin dashboard with Natural Language Processing technology.
- Implementing authentication, database storage, and SDLC methodologies.
